

Senior Transportation Project Director – Grande Prairie, AB

A Project Director is our one-point contact person that liaises with the client representative on a project.

The Project Director is responsible for managing an internal project team (which may involve sub-consultants) to ensure that the client's expectations are met and the project mission is achieved.

Candidates are expected to organize their project team in order to meet project deadlines and complete projects within budget.

Excellent communications skills are an essential component of this position.

Qualifications:

- Background in Transportation Engineering
- Experience in design and specification writing, construction estimating, contract preparation and administration and construction management is required
- Preference will be given to candidates with Alberta Transportation project experience
- Minimum educational requirements are a diploma or degree from a recognized University, technical school (such as NAIT) or community college
- Candidates should be a Civil Engineering Technologist, Professional Engineer, or be eligible for certification
